Organometallic compounds of the lanthanides, actinides. INIS For La (Z = 57) 4f is an inner orbital with 4f ca. 0.7a₀. Lanthanide. Chemistry Possibly erroneous (early) interpretation of atomic spectra – misleading . Lanthanide organometallics have different properties from transition metal equivalents. (4) Organometallic chemistry of lanthanide complexes is the concern of a relatively small . participate in bonding, unlike what has been shown for actinides.(6) . early d transition metal complexes is enhanced for lanthanides complexes. The. Organometallic Chemistry of the Actinides What can metal-ligand bonding energetics teach us about . - IUPAC Author: W. Kaim. Synthesis of Organometallic Compounds: A Practical Guide .
